GRAPHIC ORGANIZERS

5th Grade Canva Assignment

Take a moment and reflect on all of the positive aspects of your school. Consider how these aspects contribute to making your school a great place to learn and grow. Then, create a mind map (graphic organizer) depicting different things about FPDS that you love! Your map must have at least 6 areas. You may use a template already created in Canva and simply adapt it to your topic or you may start from scratch and make your own. Categories typed in bold should be your 6 section titles. Please see instructions below.

**In the middle of your map, type one of the titles below: (Choose one!)**

- What I Love About FPDS
- My Favorite Things about FPDS
- Why FPDS is Special to Me

**Six Areas to include in your map and a description:**

**The Building:**

- Describe your favorite places IN the FPDS school building.
- What are some things you’ve done there?

**The Playground:**

- What are your favorite spots on the playground?
- What games/activities have you done there?

**Teachers:**

- What are the names of your favorite teachers?
- What qualities do they have that make them special to you?
- Share a memory or experience with one of them.

## Special Subjects:

- What are your favorite special subjects?
- What do you like to do in those classes?
- What are some things you have learned in your special subjects?

## Friends:

- What do you enjoy doing with your friends during school hours?
- Why are your friends important to you?

## Special Events:

- Recall a special event or activity organized by the school (ex. field trip, class play, pep rally, field day, etc.)
- What made this event so memorable for you?

If you'd like to add additional areas on your map, consider these 2 below:

## Activities:

- What special activities have you participated in that you especially enjoy? (ex. sports, after school clubs, strings, honor choir, etc.)
- What about these activities did you enjoy the most?

## Learning Resources:

- What are some of your favorite resources or materials used in the school? (library books, art materials, computers, iPads, robots, 3D printers, PE equipment, etc.)
- How have these resources helped you with your learning?

**Extension Activity:** Create a collage by taking pictures throughout the school with your iPad representing each area you listed in your mind map. Find a collage template in Canva to use and plug in the pictures you took on your iPad. Decorate your collage to make it your own. Print both your mind map and collage and turn in to Mrs. Brister.
